

## CLL Consultant Haematologists in the UK

All Consultant Haematologists in the UK will have a good working knowledge of CLL as it is the most common form of adult leukaemia. However some Consultants have a particular interest in the disease and are often involved in the latest research into improving the treatment of CLL. The following is a list of those doctors who are recognised by their peers as having a particular interest in the field of CLL. It should be noted that in order to obtain a consultation with one of the haematologists listed in the table below, either privately or on the NHS, you will normally require an initial approach and referral letter from your General Practitioner. The contact details are provided to enable your GP to be able to do this.
